ABOUT ME

Game design has been my passion since I was first introduced to game creation in 5th grade. Though I initially pursued a different career path, I seized the first opportunity to enter the gaming industry and have thrived in it ever since. My strengths span Game design, UX design, and prototyping. I bring a creative mindset, analytical thinking, and hands-on experience across platforms, including mobile, AR/VR, and web.

TOTAL EXPERIENCE < 7+ Years >

Zynga, Bangalore — Game Designer

OCTOBER 2021 - PRESENT < 4.5 Years >

- Designed features and slot machines for major slot titles under a globally recognized IP.
- Involved in end-to-end design: from ideation and market research to documentation and implementation.
- Collaborated with cross-functional teams to deliver high-quality features that enhance monetization, retention, and player engagement.

Nukebox Studio, Bangalore — Game Designer/ UX Designer

OCTOBER 2020 - SEPTEMBER 2021 < 1 Year >

- Designed features, UX flows, and levels for a match-3 puzzle game.
- Created and optimized content for LiveOps events, improving player retention.
- Worked across teams to ensure alignment of gameplay with monetization strategies.
